

## JIMMY CRYSTAL NEW YORK EYEWEAR COLLECTION

*A&A Optical*

A&A Optical adds new styles to its Jimmy Crystal New York eyewear collection. Consisting of three new ophthalmic styles and three new sun styles, the collection is reminiscent of a collector's item and features hand-set Swarovski elements. Each style is unique and features various shapes, shimmering stone patterns and unique designs. "This season's collections explore color in frame materials and in crystal jewelry arrangements," says Walter Roth, product development manager. "The challenge is to do this in a fashionable yet elegant manner. The result—alluring and dramatic eyewear that the modern woman can wear every day and for a night on the town." All sunglass models include CR-39 or nylon lenses made in Italy.

## TOM FORD EYEWEAR COLLECTION

*Marcolin USA*

Marcolin USA introduces new Tom Ford eyewear styles for spring/summer 2017. Consisting of seven optical styles and 14 sunglass styles, the unisex collection features vintage-inspired shapes, clean lines and a new styling of the iconic "T" logo. The collection comprises both finely crafted acetate frames as well as precious metals, including premium Japanese titanium. Some styles features flat and cutaway lenses and green Barberini glass lenses made exclusively for Tom Ford. Sunglass style 0536 features genuine leather on the bridge and offers three shades of mirrored lenses for this oversized aviator shape while style 0537 is an acetate sunglass with a double bridge and classic logo on the front. –Victoria Garcia
